## Kiki... A Unique Concept.

Kiki is a little bird.

It is sad but true, our little Kiki can't fly like her friends and family.  
Kiki wants to join in and experience all that everyone else feels.

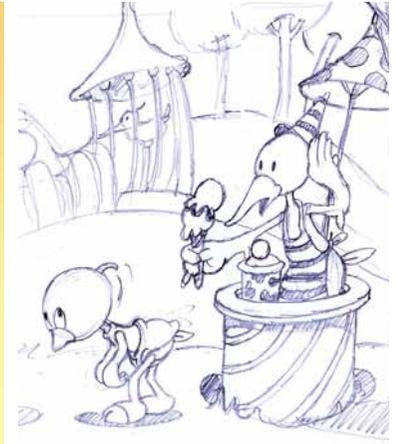

So the challenge is set in each episode for Kiki to have fun, learn, join in and share.

Luckily for Kiki, it is her father who comes to her rescue by building her, her own little plane.

Now Kiki can fly.

Kiki's adventures are brought to life through the joy of music.

## Kiki - Going To The Zoo / Completed Animated Episode

Kiki and her brother take a trip to the zoo where she discovers a whole world out there which is much bigger in size than she is.

When visiting the animals she can only see all sorts of legs. Big ones, fat ones, hairy ones, spotted ones and wet ones too.

But Kiki can't see who they belong too from down on the ground. This frustration turns into disappointment, particularly when her brother can see who all these legs belong too.

And on top of all that, a cheeky monkey steals her favourite dolly. Seeing her disappointment, her brother suggests for her to run back home and jump into her little plane.

Kiki discovers a much bigger world as she flies over the zoo and connecting a face to a leg, seeing the whole animal.

Kiki's excitement of seeing all the animals becomes infectious with the happy animals all joining into a spontaneous dance.

Kiki to the rescue. She is the only one who can fly the long distances in her plane. All the animals help to make a temporary runway over the back of the ship for her to take off and land safely.

## Kiki Merchandise / Making and Keeping Kiki Popular

With the high standard of animation, and wide "girl, boy" appeal, Kiki and Kuki are naturals for merchandise.

From the outset, merchandise has always been in front of mind, as we know the longevity this brings,

Children will also be encouraged to look after "live birds" in their own backyard.

We have a great understanding of licensing and merchandise.

Music is a natural for Kiki, as we have a song for each episode.
